PROFESSIONAL SUMMARY

Highly motivated and results-driven Frontend Developer with nearly 3 years of professional experience specializing in the React ecosystem, TypeScript, and modern state management tools. Adept at building scalable, high-performance web applications from the ground up, integrating secure APIs, and engineering seamless user experiences (UX). Combines a deep technical background with strong business logic comprehension to deliver optimal architectural solutions under tight deadlines. Proven track record in both developing enterprise-grade commercial platforms and mentoring aspiring developers.

TECHNICAL EXPERTISE

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Libraries & Frameworks	React, Next.js (Pages Router), VueJS, SPA architecture
State Management	Redux, Redux Toolkit, Zustand, Context API
Styling & UI Tools	Tailwind CSS, Sass / SCSS, Responsive Web Design
Backend & Database	Node.js, Express, REST API Integration, MongoDB
Tools & Workflows	Git, GitHub, Vite, Version Control, Docker (Foundations)

PROFESSIONAL EXPERIENCE

Front End Engineer & Instructor

October 2023 – Present

Algoritm Ta'lim — Namangan, Uzbekistan (algoritmedu.uz)

- Successfully engineered and deployed 4-5 real-world commercial platforms, focusing on robust frontend execution, API integration, and high-fidelity UI rendering.
- Architected core components for a complex **Fitness Club Management Platform**, streamlining user workflows and layout interactions using React and Tailwind CSS.
- Developed and optimized data-heavy enterprise **CRM Systems** and business automation platforms, enhancing operational productivity through reactive states with Redux Toolkit and Zustand.
- Instructed and coached students on modern frontend frameworks, clean code standards, semantic HTML/CSS, Git version control workflows, and project life-cycle execution.
- Strengthened overall software maintainability and team velocity by championing standard component design patterns and comprehensive technical documentation.

SELECTED PROJECTS

Fitness Club Management SaaS Platform

Commercial Launch

Tech Stack: React, Redux Toolkit, Tailwind CSS, REST API

- Designed and deployed an intuitive, responsive user interface to handle real-time scheduling, member check-ins, and subscription tier management.
- Implemented centralized global states to efficiently synchronize cross-component operational flows, ensuring quick load times and high performance.

Enterprise CRM & Business Automation Modules

Production Phase

Tech Stack: React, TypeScript, Zustand, REST APIs

- Engineered highly dynamic data tables, filtering dashboards, and automated lead tracking panels tailored for local enterprise automation needs.
- Leveraged TypeScript for absolute type safety across complex data objects, dramatically lowering production-stage edge cases and runtime bugs.

EDUCATION

Bachelor of Science in Mechanical Engineering

2017 – 2021

Namangan Engineering Construction Institute — Namangan, Uzbekistan

Specialization: Mechanical Design Engineer

PROFESSIONAL CERTIFICATIONS

Next.js Pages Router Fundamentals	<i>NextJS Official Platform</i>	2026
Microsoft Front-End Developer Specialization	<i>Coursera</i>	2026
Foundations of Coding Front-End	<i>Coursera</i>	2026
Introduction to Web Development	<i>Coursera</i>	2026
Version Control with Git	<i>Coursera</i>	2022

LANGUAGES

Uzbek: Native **English:** B2 (Upper Intermediate) **Russian:** A2 (Elementary)
